**On Point Technology launches the OPTimum Integrity Cloud Suite,
Featuring **OPTimum Identify Proofing Service.****

OPTimum Identity Proofing Stops Fraudulent Claims In Their Tracks.

[Oakbrook, IL, August 11, 2020] – On Point Technology, the UI leader in fraud prevention software, launched its innovative Unemployment Insurance Fraud prevention and detection cloud-based software suite “OPTimum Integrity Cloud”. This state-of-the-art software is a next-generation UI integrity solution that leverages decades of UI experience, millions of dollars in R&D, and the power of cloud computing. With years in the making, our modern and innovative solution solves the current UI Fraud Crisis in your agency faster than ever before.

On Point Technology’s is proud to present this months featured OPTimum Integrity Cloud product **OPTimum Identity Proofing**. The only fraud check that stops organized fraud in its tracks. By crossmatching the individual’s driver’s license or state issued ID against the national Drivers’ License Data Verification Service. Using a mobile device or desktop computer with a camera, the Unemployment Insurance applicant scans the barcode on the back of their license or ID. The detailed information in that bar code containing up to 17 data elements is immediately matched against the national repository to verify the person’s identity. The live scan proves in real time that the individual has a state issued Identification in their possession. The process is quick and easy having minimal impact on legitimate. **As Fraudsters rely on stolen data, and do not have a physical ID, this will absolutely stop the Fraud.**
